

**KING INDUSTRIES
JOB DESCRIPTION
ELECTRICIAN**

Location: Norwalk, CT

King Industries, Inc. is actively seeking a skilled Electrician to join our Maintenance team. The ideal candidate will possess a high school diploma (or equivalent), have completed 4 years of electrician trade school, and bring at least 2-5 years of experience in troubleshooting and repairing instruments and electrical equipment. A Connecticut State E-1 Electrical License is required for this position.

This role involves performing critical maintenance on electrical equipment and playing an integral part in supporting our plant's operational excellence year-round.

1. **Skills Required:**

- Ability to work in a team environment.
- Knowledge of mechanical ability to troubleshoot, repair and maintain electrical and electronic control instruments and process equipment.

2. **Education and Experience Requirements:**

- High school diploma or equivalent and 4 years' trade school.
- 2-5 years experience as an instrument and equipment troubleshoot and repair electrician.
- Connecticut State E-1 electrical licenses.
- Experience in industrial electrical work preferred.

3. **Duties and Responsibilities:**

- Read, interpret, and create blueprints to support project completion.
- Troubleshoot, repair, and maintain pneumatic/electronic controls, electrical instruments, and equipment.
- Assist with the movement and installation of equipment at various elevations.
- Install conduit, instrument cables, trays, and other necessary support systems for electrical infrastructure.
- Install electrical equipment, including motor control centers and control room systems.
- Perform preventive maintenance on electrical equipment throughout the plant year-round.
- Comply with company safety programs and maintain a safe working environment.
- Work Maintenance Saturdays twice a month, as part of the scheduled maintenance routine.
- Participate in company-wide efforts to promote and adhere to quality, occupational health & safety, and environmental (QHSE) management systems in alignment with ISO 9001, ISO 45001, and ISO 14001 standards.
- Maintain an understanding of how deviations from established controls and criteria may impact the QHSE Management Systems.

If you are interested in the position, please submit your cover letter and resume to careers@kingindustries.com.
